

GROWTH / MECHANISMS / AI

Why Follow \$SAI

A clear roadmap. Transparent supply mechanics.

Connecting AI services with on-chain participation, from validation to global scale.

- ROADMAP / 3 PHASES
- MECHANICS / 3 PROTOCOLS
- AI / SUBSCRIPTIONS / MINING

01 Ecosystem Growth Roadmap

ECOSYSTEM ROADMAP

From product validation to a global ecosystem. Figures below are planning targets.

Foundation	\$SAI / BSC • Subscriptions: 19 / 99 / 169 USDT • Smart Mining Pool • One-click API delegation Price Defense Protocol • Price Balancing Protocol • Mandatory Price Support Protocol
PHASE 01 2026.10–12 Validation & Market Entry	- Hot-swappable AI models, multi-DEX routing optimization, on-chain data security 5K–10K seed users; Skill Marketplace beta; community feedback channels - Asia-Pacific focus: Singapore, Hong Kong and Southeast Asia - Launch of the Smart Mining Pool program and Super Agent whitepaper
PHASE 02 2027.01–06 Growth & Ecosystem Expansion	- Cross-chain trading, adaptive strategy generation and institutional risk controls 50K–150K active users; 500+ strategists on the Skill Marketplace - DAO governance launch; support for 15+ languages - Mandatory Price Support burns begin; subscription payment share rises to 60%+
PHASE 03 2027.07–10 Ecosystem Maturity & Funding	- Omnichain decision systems, native cross-chain support, DeFi integration, tail-risk alerts 200K+ users worldwide; 1,000+ strategists onboarded - Refinement of self-improvement mechanisms - SAI payments supported across all core services

02 Supply Mechanics, Visualized

SUPPLY MECHANICS

Pool deflation, buyback-and-burn, tax-rate defense and dual release triggers.

01 / SUPPLY

Mandatory Price Support

6% / day

When pool holdings exceed 100M tokens, the pool contracts by 6% per day.

02 / LIQUIDITY

Liquidity-Triggered Release

2% → 80%

The pool contracts by 2%; 80% of that contraction becomes release output.

03 / TIME

Time-Triggered Release

72h · 1:1

Automatic release every 72 hours, matching the previous round 1:1.

Liquidity Pool Token Balance

Pool deflation & releases • Illustrative balance changes

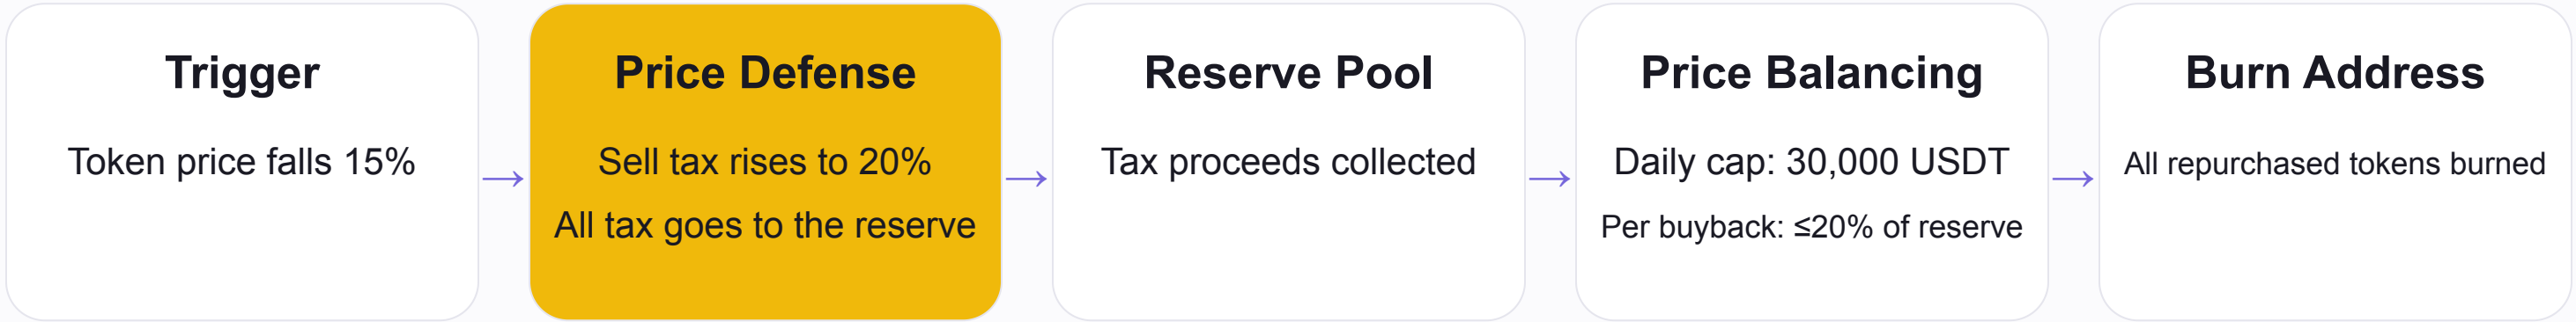

6% daily contraction • Liquidity + time triggers

\$SAI Price Movement

Price defense & ecosystem buybacks • Illustrative uptrend

Price defense → Reserve buybacks → Ecosystem buybacks

Price Defense & Buyback Flow

03 \$SAI in Eight Numbers

WHY SAI

01

1 Billion

Total Supply

Total supply: 1 billion SAI

02

77.5%

Smart Mining Pool

775M tokens allocated to mining

03

5% Buy/Sell

Transaction Tax Allocation

50% reserve • 30% WBTC
20% LP

04

3 Protocols

Market Value Protection

Price defense • Price balancing
Mandatory price support

05

2 Triggers

Dual Release Mechanism

Liquidity + time-triggered releases

06

3 Burn Paths

Three SAI Burn Mechanisms

Buyback burn / Subscription burn
Liquidity deflation burn

07

30%

WBTC Distribution Pool

30% of transaction fees
flows into the WBTC pool

08

60 / 40

Staking & Mining

Static 60% / Dynamic 40%
Deposit or withdraw principal anytime

AI Tools × Subscriptions × Staking & Mining

\$SAI connects the entire ecosystem.
